

Potential Digital Product ideas - Be excited

Start writing down every skill you have naturally or have worked to attain. The knowledge that comes easily to you or that you are drawn to or you can talk about for hours without a getting bored. Think about your life experiences good or bad. If bad think on how you overcame or are working through it. Take time to think about your skills, knowledge & experiences from school to the present. You'll be surprise what you know or can do no matter how small or unexciting in your eye can benefit others. Don't over think how you will monetise it yet. This is your time to just write.
